

C2 Specialist Investments allows investors to access investment strategies and structures not readily available to retail investors in Australia. These types of investments are often known as “structured products” and are designed to facilitate highly customised risk-return objectives.

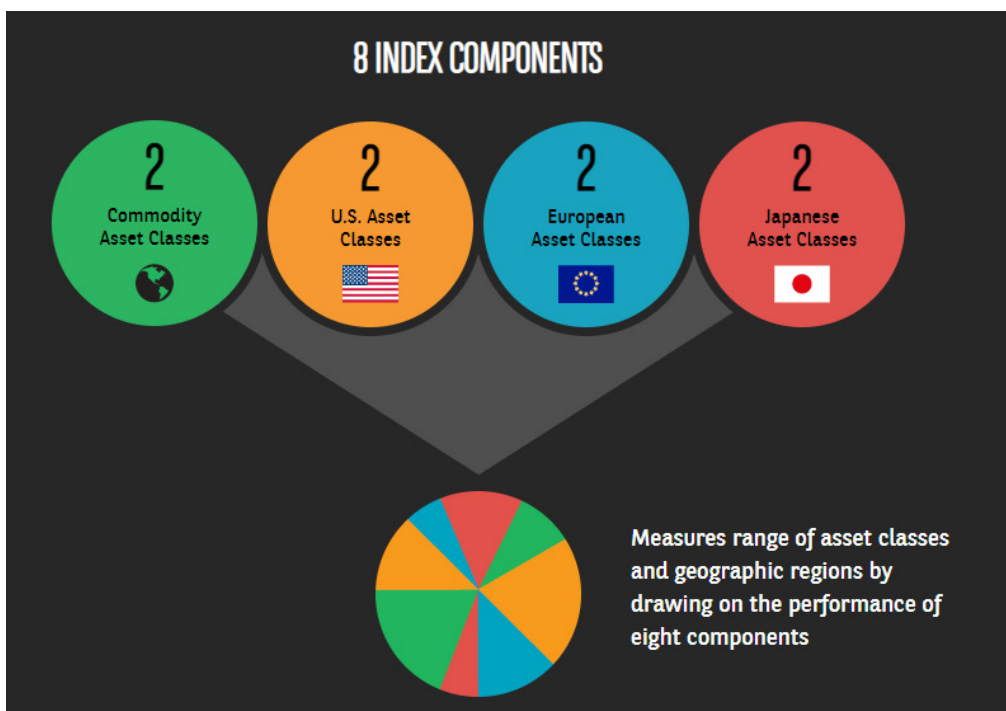

The Units in C2 - Gateway - Series 34 (“**Series 34 Units**” or “**Units**”) offer investors the ability to gain exposure to the performance of the BNP Paribas Multi Asset Diversified 5 Index (the “Reference Asset”).

In addition, the C2 - Gateway - Series 34 Units offer:

- The ability to borrow 100% of the investment amount via a Limited Recourse Loan (“Investment Loan”), at competitive interest rates of 1.99% p.a.
- Four potential Performance Coupons at the end of Year 1, Year 2, Year 3 and Maturity (subject to a 10% Performance Fee).

The BNP Paribas Multi Asset Diversified 5 Index is a rules-based index with a diversified global exposure (US, Europe, Japan). The Reference Asset measures a range of asset classes and geographic regions by drawing on the performance of eight components including global equities, global bonds and commodities.

Hypothetical Example

An Investor wants to invest into C2 - Gateway - Series 34. The Interest Rate on the Investment Loan associated with C2 - Gateway - Series 34 is 1.99%p.a and the Investor is required to prepay all four (4) years Interest in advance. Your adviser may also charge an Adviser Fee, for the purposes of this example this is assumed to be \$0.

The Investor decides to invest \$100,000 and outlays \$7,960 cash. The investor likes that the Investment Loan is Limited Recourse to the Units and that:

- ✓ There is a high 100% LVR loan (LVR = Loan to Valuation Ratio)
- ✓ any positive returns are paid out annually in the form of Performance Coupons;
- ✓ he cannot lose more than his Prepaid Interest and any fees (\$7,960 in this example);
- ✓ there will never be a margin call on the investment;
- ✓ if the investment returns are negative, there is no shortfall to pay at Maturity;

Below are hypothetical calculations based on a \$100,000 exposure to the Reference Asset.

	Amount
Investment Amount	\$100,000
Investment Loan (100% LVR)	(\$100,000)
Prepaid Interest (1.99%p.a x 4 years)	(\$7,960)
Adviser Fee (as agreed with investors adviser)	\$0
Total cash outlay	(\$7,960)

	Reference Asset Performance (per Coupon period)*	Total Reference Asset Performance (compound)*	Net Performance Coupons (AUD)**	Net Cash Gain/ (Loss)**	Net Return on Investor's Cash Outlay over 4 Year Term (%)***	Net Return on Investor's Cash Outlay (% p.a)***
Scenario 1	Down -2.5% p.a	0.00%	\$0	-\$7,965	N/A. Loss	N/A. Loss
Scenario 2	Up 2.15% p.a	8.88%	\$7,993	\$28	Breakeven	Breakeven
Scenario 3	Up 5% p.a	21.55%	\$19,396	\$11,430	143.5%	24.9%
Scenario 4	Up 7.5% p.a	33.55%	\$30,192	\$22,227	279.0%	39.5%
Scenario 5	Up 10% p.a	46.41%	\$41,769	\$33,804	424.4%	51.3%

* Hypothetical only. For illustrative purposes and not an indication of expected future performance.

** Cumulative value of Performance Coupons (Net of Performance Fees, ignores AUD/USD exchange rate movements and tax).

*** Cumulative return over the life of the investment (i.e. not a per annum per return).

Hypothetical Calculations Methodology

The net return calculations in the tables above under the heading “Hypothetical Example” were calculated using the following formulae:

Net Return on Investor’s Cash Outlay over 4 Year Term:

$$= (\text{Net Cash Gain}/(\text{Loss})) / (\text{Prepaid Interest})$$

Where Net Cash Gain/(Loss) is the sum of all cash flows (both positive and negative) from Commencement to Maturity (as per the example in the table above).

and

Net Return on Investor’s Cash Outlay (% p.a):

$$= (1 + \text{Net Return on Investor’s Cash Outlay over 4 Year Term})^{0.25} - 1$$

These calculations do not take into account additional variables that may be relevant to an Investor’s overall return, including, but not limited to, variables such as:

- (a) tax;
- (b) timing of cash flows;
- (c) opportunity costs.

Investors should be aware that different calculation methodologies which take into account one or more of the above variables (or any other variable) or otherwise utilise any alternative formulae may yield materially different results than those shown above. Investors should obtain independent financial and taxation advice as to the suitability of this investment to them having regard to their investment objectives, financial situation and particular needs.

Key Risks:

Key risks include:

- Your return (including any Performance Coupons) is affected by the performance of the Reference Asset. There is no guarantee that the Reference Asset will perform well.
- There will be no Performance Coupons payable if the performance of the relevant Reference Asset during the period is negative, or not greater than the sum of the previous Gross Performance Coupons already paid.
- The Performance Coupons are subject to movements in the AUD/USD exchange rate.
- There is no guarantee that the Units will generate returns in excess of the Prepaid Interest and any Adviser Fee (if any) during the Investment Term. You could lose some or all of your Prepaid Interest and any Adviser Fee (if any) paid during the Investment Term. Additionally, in the event of an Investor requested Issuer Buy-Back, you will not receive a refund of your Prepaid Interest or Adviser Fee (if any), nor will you be entitled to any future Performance Coupons.
- Gains (and losses) may be magnified by the use of a 100% LVR Investment Loan. However, please note that the Investment Loan is a limited recourse loan, so, in respect of the Investment Loan, you will never lose more than the Prepaid Interest and any Adviser Fee (if any).
- The Units are designed to be held to Maturity. If Investors elect an Issuer Buy-Back, Investors are not entitled to a refund of any Prepaid Interest or any Fees, and may receive substantially less than their Prepaid Interest and any Fees paid at Commencement and the buy-back price may be nil. However, there will never be a liability owing by the Investor, as the Loan limited recourse
- Investors are subject to counterparty credit risk with respect to the Issuer and the Hedge Counterparties.
- The Units may mature early following an Early Maturity Event, including an Adjustment Event, Market Disruption Event or if the Issuer accepts your request for an Issuer Buy-Back.
